

SMARTSHIP

(FEELING IS BELIEVING)

Job Vacancy: Junior R&D Engineer Opportunity at Smart-Ship

Passionate about innovative engineering? Do you have practical experience in technical drawing, working with embedded systems, and love to tackle unique challenges? If you answered yes, Smart-Ship is looking for you!

Smart-Ship proudly leads the way in the development of force-feedback controls for the maritime sector. Our ambition? To steer the maritime industry towards a sustainable future through advanced technology. Located within the vibrant ecosystem of the YES!Delft startup incubator, we are surrounded by forward-thinking innovators and entrepreneurs.

We're on the lookout for an eager Junior R&D Engineer to join our dynamic, young team. If you thrive in a fast-paced environment where every day brings new challenges, then you're just the person we need.

About You:

- You have hands-on experience in technical drawing and working with embedded systems.
- You're flexible, love to learn, and can adapt to a rapidly changing environment.
- You're a team player with the ability to work independently.
- You possess strong problem-solving skills and can think on your feet.
- You have a keen interest in sustainability and technology in general.

What We Offer:

- A platform to make significant contributions towards a more sustainable maritime industry.
- An opportunity to be a part of the dynamic YES!Delft startup incubator community.
- A stimulating work environment with a strong focus on professional development.
- A competitive salary and benefits package.
- A supportive team that values your contributions and ideas.

Please apply with your CV and a brief cover letter, telling us why you're the perfect addition to our team.

Smart-Ship is an equal opportunity employer. We encourage applicants from all backgrounds and experiences.

Join us as we navigate towards a sustainable future in the maritime industry!

For any further information about the role, please feel free to reach out to us at info@smart-ship.eu.

If you're energized about creating innovative solutions within the maritime sector, we'd love to hear from you!
