

Job Vacancy: R&D/Software Engineer Opportunity at Smart-Ship

Passionate about innovative engineering? Do you have practical experience working with embedded systems, programming (C++ & python) and love to tackle unique challenges? In that case, Smart-Ship is looking for you!

Smart-Ship proudly leads the way in the development of force-feedback controls for the maritime sector. Our ambition? To steer the maritime industry towards a sustainable future through advanced technology. Located within the vibrant ecosystem of the YES!Delft startup incubator, we are surrounded by forward-thinking innovators and entrepreneurs.

We're on the lookout for eager R&D and Software Engineers to join our dynamic, young team. If you thrive in a fast-paced environment where every day brings new challenges, then you're just the person we need.

About the Role:

- You'll be part of a small team, developing force-feedback maritime controls and innovative digital maritime solutions.
- Your main activities will take place in software engineering and networking between systems both onboard and onshore.
- Software engineering at smart-ship can vary from writing simple support tools to developing an embedded code base for our levers or implementing advanced control algorithms for autonomous shipping.
- Other activities might include hardware development, technical customer support, commissioning of products with customers, and quality control of our products.

About You:

- R&D Engineer: You have hands-on experience with mechatronic systems, technical drawing and working with embedded systems (pre).
- Software Engineer: You have practical knowledge of Python, C++, Git, CI/CD (pre), PLCs (pre), and embedded systems (pre).
- You're flexible, love to learn, and can adapt to a rapidly changing environment.

- You're a team player with the ability to work independently.
- You possess strong problem-solving skills and can think on your feet.
- You have a keen interest in sustainability and technology in general.
- You are fluent in English.
- You have strong interpersonal skills.

What We Offer:

- A chance to contribute to a more sustainable maritime future.
- An opportunity to be a part of the dynamic YES!Delft startup incubator community.
- A stimulating work environment with a strong focus on professional development.
- A competitive salary and benefits package.
- An enthusiastic team that values your input and ideas.
- Free lunch and regular drinks on Friday!

Please apply with your CV and a brief cover letter, telling us why you're the perfect addition to our team.

Smart-Ship is an equal opportunity employer. We encourage applicants from all backgrounds and experiences.

Join us as we navigate towards a sustainable future in the maritime industry!
